Architect's Blend is a granulated, homogeneous blend of diverse organic meals and other nutrients. It can be used as a pre-plant fertilizer and soil amendment for sand-based golf courses, athletic field construction and other landscape applications.

Architect's Blend combines both naturally occurring and synthetic nutrients selected for their nutrient release and availability characteristics as well as their root zone enhancing properties.

Application Guidelines

Rake into the top 2.5 to 8 cm (1 to 3 inches) of root zone prior to seeding, sodding or sprigging.
