

Thatch-X®

4-2-2

Granular Turf Supplement

Thatch-X is a blend of food and feed-grade organic meals and cold water seaweed.

Application Guidelines

Apply after soil temperatures are consistently above 40°F and daytime high temperatures are above 60°F. Thatch-X will be effective at somewhat lower temperatures, but may take longer to produce results. Apply only after danger of freezing has past. This product is intended as a supplement to a regular fertilization program. For best results use in conjunction with a slow release nitrogen fertilizer program and apply directly after core aeration.

Use Thatch-X with an integrated program to help manage conditions that promote thatch build up. Regular use of slow release nitrogen fertilizers are suggested to avoid surge growth which leads to increased thatch accumulation.

Guaranteed Analysis

Total Nitrogen (N) 4.0%
0.1 Ammoniacal Nitrogen
1.8 Water Soluble Organic Nitrogen
2.1 Water Insoluble Nitrogen
Available Phosphate (P₂O₅) . . . 2.0%
Soluble Potash (K₂O) 2.0%

Nutrients derived from: Kelp Meal, Fish Meal and Alfalfa Meal.

F46

Application Rates

Apply Thatch-X at the rate of 3 lbs. per 1,000 sq. ft. as often as desired during the growing season in conjunction with core aeration, deep verticutting, DryJect aeration, or similar aeration technologies. Thatch-X can also be applied at a rate of 1-1.5 lbs per 1,000 sq. ft. in conjunction with light verticutting.

Storage and Handling

Thatch-X should be stored in a dry location. Keep sealed when not in use. Do not freeze. Do not store in direct sunlight or in temperatures above 90°F. Optimum storage temperature is between 40° and 70°. Keep out of reach of children.
